MGA NEWS AND VIEWS

By Jim Chittenden

How hot was it? It was hot enough to fry an egg on the sidewalk. I was going to send you a picture of an egg frying on the sidewalk with the label "Too Darned Hot". With the air temperature at 112°, the sidewalk temperature measured 137° on my digital meat thermometer. The egg did not cook. The internet says 150° is required to cook an egg. Call me a liar for a mere 13°, but I still say July and August have been too darned hot. No tournaments until September, thank goodness.
